علي هيثم يوسف

has successfully completed the online Specialization

Master DevOps: CI/CD, Automation & Monitoring

In this Specialization, learners developed essential skills to thrive in the fast-evolving DevOps landscape, including version control with Git, CI/CD automation using Jenkins and Ansible, infrastructure as code with Terraform and AWS CloudFormation, containerization with Docker, and orchestration using Kubernetes. The Specialization also focused on monitoring and observability with Prometheus and Grafana, emphasizing hands-on learning through real-world projects. Learners applied their knowledge to build, deploy, and manage automated and scalable DevOps pipelines.
